New smartphone?
No, a smart device for smart glucose monitoring

A truly non-invasive glucose monitor for you

GlucoTrack Model DF-F is intended for use by adults only, aged 18 years and above who have type 2 diabetes and prediabetes.
Designed for you…
GlucoTrack consists of two components: a Main Unit and a Personal Ear Clip (PEC)

Pain-free testing… at last
• No more pricking involved with the measurement

Just clip it!
• Clip the PEC onto your earlobe, sit back, relax and let the device do the rest

Practical
• For home/indoor use
• Large colour touch screen so you can read your results easily
• Audible results and instructions for patients who are visually impaired

Cost-effective
• A one-time Main Unit cost
• Up to 3 users per Main Unit
• No incremental cost
• PEC is valid for 6 months
A truly non-invasive glucose monitoring device

…to keep track of your diabetes

**Improve your disease management**

- Have the freedom to measure as often as you need
- GlucoTrack has a measurement range of 3.9-27.8 mmol/L
- Estimated HbA1c lets you see how well you manage your diabetes

**Obtain measurements you can rely on**

- GlucoTrack Model DF-F is CE Mark certified
- Demonstrated by clinical trials

…and have that meaningful conversation with your doctor

**Easy data download**

- Share your glucose history during consultations

…for a better quality of life.
Frequent glucose monitoring may help you to control and manage your diabetes

We understand that living with diabetes can be difficult, both practically and emotionally. But it doesn’t have to be this way. We are here to help you along your journey with a unique solution to give you the quality of life you’ve been waiting for.

Do you know that there are many benefits to frequent glucose monitoring?

- You may understand your diabetes better
- You may also reduce the risk of other health complications such as eye disease, kidney disease and amputation

Monitor more for better control

- Having a long-term view of your glucose trends will help you and your doctor to manage your diabetes care

Start with a few small steps and you may see a big change

- See the difference changes to your diet, exercise habits and lifestyle have on your glucose levels
- Have the self-confidence to help you to manage your diabetes
- You can feel empowered and more motivated to lead a healthier life
- In fact, frequent glucose monitoring may increase your life expectancy

Frequent glucose monitoring is not just for people with diagnosed diabetes

- Prediabetes is common and can lead to diabetes
- If you are prediabetic, glucose monitoring may delay or even prevent diabetes

10. ADA Standards of medical care in diabetes, Diabetes Care 34 (sup 1), Jan 2015.  
Taking the pain out of glucose monitoring

GlucoTrack Model DF-F is intended for use in non-invasive quantitative spot measurement of glucose, for home-use. The GlucoTrack Model DF-F is intended for use by adults (over the age of 18 years old) type 2 diabetic patients, as well as pre-diabetic patients. Medications intake/treatment decisions should not be based only on measurements by GlucoTrack model DF-F. The GlucoTrack Model DF-F is a monitoring device and should not be used for diagnosis.
